ATEX INSTRUMENTATION

ZONES 1, 2 (gas) & 21, 22 (dust)

The TDD-BAD-BBN-TF is an explosion-protected LED TOF distance sensor designed for reliable object detection and distance measurement in hazardous areas.

With a measuring range from 100mm to 1000mm, RS-485 communication and a short-circuit protected push-pull digital output, it provides a robust solution for industrial applications requiring precise proximity detection.

Its M30 nickel-plated brass housing, IP67 protection rating and ATEX/IECEX certifications make it suitable for use in gas and dust explosive atmospheres, specifically in Ex zones 1, 2, 21 and 22.
